

Safety and health services

Putting **safety first** can reduce costs. But more importantly, **it saves lives.**

Our mission to create effective workplace safety cultures is driven by our vision to make Oregon the safest and healthiest place to work. In a great safety culture, safety becomes a lifestyle—a way of living and a way of doing business. We have a team of more than 50 safety and health consultants throughout Oregon who are ready to help you fulfill that vision.

About SAIF's safety management consultants

- Your safety management consultant is a responsive, expert, and professional partner committed to the success of your business and to helping you make your workplace as safe and healthy as possible in ways that fit your business model.
- By collaborating with your consultant to identify injury trends, you can help identify solutions before these issues affect your company.
- We can come to your workplace to help you enhance your overall safety and health culture. We also help you identify and control hazards, as well as possible Oregon OSHA compliance issues. After the visit, our consultant gives you written recommendations for improving workplace safety and health.
- Safety management consultants can lead a variety of on-site training sessions to help you and your employees learn simple, effective, and affordable ways to improve workplace safety.
- Your safety management consultant also can evaluate indoor air quality, noise, and dust exposures in your workplace. If necessary, a referral will be made to one of our certified industrial hygienists for a more complex exposure evaluation. Our industrial hygiene staff often consult with

the claims team as part of an investigation of occupational health-related claims.

- Your consultant can provide you with resources for hiring practices and developing your safety-related policies and procedures.
- You can always ask our consultant to show you how to review policy and claims information through our secure website 24 hours a day.

The SAIF safety advantage

We're big believers in "Total Worker Health"—the integration of all-around health and wellness with safety and health on the job. It takes the broadest possible view of what causes injuries and focuses on prevention, 24 hours a day. Total Worker Health can save employers money and—more importantly—save workers from suffering preventable injuries and illnesses.

And because virtually all injuries are preventable, partnering with SAIF helps keep your employees on the job and can reduce your costs.
