Learn more

Ergonomics is about arranging our environments so we can work comfortably and safely. Learn about ergonomic workstations, mobile devices, proper posture, stretching, and more at saif.com/ergo

A total online solution for a healthy and productive workplace.

Empower your people to make instant ergonomic improvements to their workplace while you manage the process.

What's in Ergopoint?

Ergopoint is a cloud based office ergonomic assessment tool that empowers your people to make instant ergonomic improvements to their workplace.

Ergopoint does the following:

- Speeds up the assessment process, provides employees with instant feedback on how they can set up their workstations
- Helps you manage when, where, and even if equipment is needed
- Provides data to help you manage office issues

- Improves the office ergonomic consulting process when a deeper level of consultation is needed

Launch, manage, and sustain an ergonomics process on your own.

Ergopoint works on all major browsers and modern devices. No software to install, nothing to download. Easy!

Learn how Ergopoint[®] can work for you. Contact our safety team at ergopoint@saif.com or call **503.373.8100**

LEARN

E-Learning teaches your employees how to set up their workstation properly.

DO

Self-Assessment provides immediate feedback and recommendations.

MANAGE

Manage helps you prioritize issues, track action plans, and monitor trends across locations.
