What does **water** do for you?

- Provides a moist environment for ear, nose, and throat tissues
- Prevents memory loss as you age
- Helps brain manufacture hormones and neurotransmitters
- Regulates body temperature by sweating and respiration
- Acts as a shock absorber for brain and spinal cord
- Helps deliver oxygen throughout the body
- Lessens addictive urges, including caffeine, alcohol, and certain drugs
- Aids in digestion
- Delivers nutrients to the cells, allowing them to grow, reproduce, and survive
- Flushes body waste to the liver and kidneys for removal
- Lubricates joints and lessens discomfort from arthritis or back pain
- Allows for efficient cell repair

**Water** makes up about **60% of your total body weight**
