

Working together, we deliver competitive rates, safety expertise, and complete claim management.

AGC, in partnership with SAIF, offers a workers' comp program designed exclusively for construction companies. The program provides a group discount for those that meet underwriting eligibility criteria, competitive rates, the AGC premium volume discount, Oregon's most comprehensive workers' comp claim management program, and unparalleled construction industry safety expertise.

AGC members insured by SAIF can benefit from safety management services provided by safety and health consultants with construction expertise. The AGC safety team is made up of seven safety professionals across the state who provide a wealth of knowledge in safety- and health-related services unequalled in the construction industry.

Services provided by the AGC safety and health team include:

Safety and health services

- Construction safety management consulting
- Technical expertise
- Program and policy development
- Site safety survey and support
- Sample safety manual
- Accident prevention
- Incident investigation support
- Claim review and analysis
- Education
- Training
- Cultural shift through continuous improvement

Industrial hygiene services

- In-house AGC occupational health consulting/certified Industrial Hygienist
- Hazard identification at group and individual employer level
- Exposure sampling, analysis, and correction recommendations

Professional development

- Supervisory Training Program
- 100-Series Courses
- CESCL
- Army Corps Quality Management

Workforce development

AGC partners with training centers and educational entities across the state to enhance and develop programs that build and grow the construction workforce pipeline for today and the future.

- High school and post-secondary education and training
- Construction workforce development programming
- Educator Externship
- Construction careers digital marketing
- Workforce development grant program
- Facilitation of statewide Construction Workforce Coalition

Councils, committees and involvement

The strength of AGC comes from the guidance and active involvement of members on councils and committees. The area councils also provide an important local perspective that guides the development of the chapters service and initiatives. Below are a few of the active councils and committees:

- Central Oregon Area Council, Klamath Falls Area Council, North and Central Coast Area Council, Rogue Valley Area Council, South Coast Area Council
- Specialty Contractors Council
- Professional & Industry Associates Council
- Construction Leadership Council
- Safety & Health Council
- Workforce and Professional Development Committee
- Heavy, Highway, Utility Contractors Council
