

Partnering to improve **safety and health** for Oregon's special districts and provide the **best workers' comp coverage**

The basics

We all know that Oregon's special districts face some difficult workplace safety challenges. To create additional value and help protect the employees of the more than 900 special districts in Oregon, SAIF and SDAO have joined forces to better serve you. Together, we are creating a sustainable workers' comp program for all Oregon special districts that wish to participate.

Membership in the SDAO servicing group will be available to all Oregon special districts who are insured with SAIF for workers' compensation and are members of SDAO.

Benefits specific to this program

- **SDIS multiline discount** | SDAO special district members participating in the SDIS property/liability program will receive a 4% discount on their property/liability contribution if they also choose to participate in the servicing group.

- **Group discount** | SDAO members in good standing that meet the SAIF underwriting and eligibility standards may qualify for an additional discount on their workers' comp policy.
- **Training** | Members get access to both the SAIF and SDAO online training systems, which include the latest advice on ergonomics and other safety and health topics.
- **Specialized expertise** | SDAO has specialized expertise in special district operations — as well as risk management consultants who are experts in workers' comp, employee safety, property risk assessments and general liability.
