

Box cutter pointers

Should I wear gloves?

Box cutter blades are razor-sharp. Wear gloves if you can.

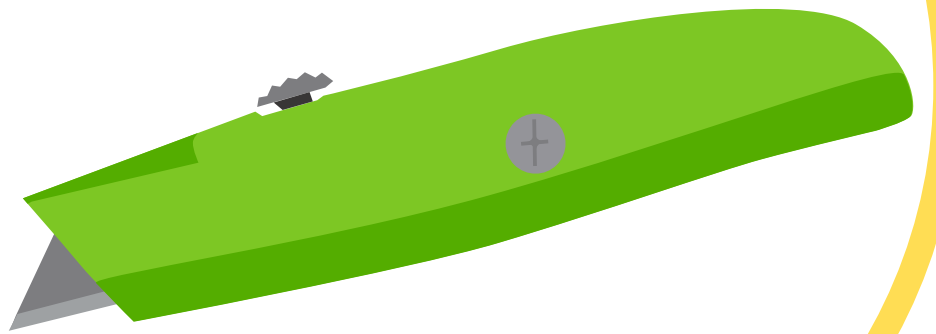

1

Is my blade sharp?

Yes—and keep it that way. Dull blades tug and snag, increasing the chance of slipping. Also, expose only enough blade to do the job.

2

Select a box cutter with safety features, such as guards.

Which direction should I cut?

Cut deliberately and at an angle away from your body.

3

Where does my knife go when I'm done?

When you're not using it, retract the blade and store the knife safely. (Or use a self-retracting blade.)

4

Where do I put dull blades?

Always use a designated disposal box that is puncture resistant.

5

How do I feel? Being distracted, stressed, or overly tired can be unsafe, too.
