# How quickly do you react?

Ask someone to hold this card about three inches above your thumb and forefinger.

## Dangerous

Your reactions are dangerously slow and could cause a crash resulting in death or serious injury.

## Terrible

Your reaction time is terrible and means that, when braking, you will take much longer to stop than you should.

## Poor

Your reaction time is poor. You would have to stay alert at all times to avoid an accident.

## Average

Your reaction time is fair, but don't be complacent, and stay alert at all times.

## Excellent

Your reactions are great, but make sure you keep focused at all times.

**See how quickly you can catch it.**
